FrutaMIDI LaTeX Smoke Test

Documentation engineer

T-006-DOC

This page checks that the project-local TinyTeX builds an article with a booktabs table and a numbered equation. The values are placeholders, not project data.

Table 1: Smoke-test table (two rows, placeholder values).

Item	Value
Row A	1
Row B	2

Table 1 has two rows. Equation (1) is the RC time constant, used here only as typesetting content:

$$\tau = R\,C \tag{1}$$

Package checks (placeholder content):

- siunitx: $10\,\mathrm{k\Omega}$
- enumitem: this compact list
- caption: the table caption above
